

PLEASE!!!! XM Satillite is a god send to those of us who spend 4-6 weeks at a time on the road. This is our only link to the "real" world. My husband and I are team OTR truck drivers and before XM we could not keep up with all the happenings of our world. We do not stop at truck stops and spend time watching TV.. We run 24/7 most of the time. If we had been XM subscribers when the 911 attacks happened we would have known before our children called to tell us about it. The traffic and weather info stations have kept us from running in very dangerous weather conditions...preventing an accident that might have happened had we not known the road conditions. If you need to get rid of something of no value to most,,,get rid of all the porno cable channels that children are exposed to. Leave our XM as it is. The truckers of the country are better off since XM came into being.

Thank You,

Joyce Turner
